SEPTIC SYSTEM ABANDONMENT

Abandonment of subsurface sewage disposal system components (i.e., septic tank, hollow leaching structures) or cesspools shall be performed in such a manner as to eliminate the danger of the system components or structure inadvertently collapsing. The responsibility for abandonment lies with the property owner.

- Structures that are to be abandoned shall be emptied of all sewage/wastewater prior to abandonment.
- A <u>licensed</u> Septic Pumper must pump out the septic tank and any hollow structures.
- Structures shall be filled with sand/gravel or crushed, and then the area backfilled with clean soil.
